EXPERIENCE

Software Engineer Intern

April 2026 – October 2026

Mistral AI

Paris, France

- Built and launched MCP Debugger, a public developer platform reducing connector debugging time by over 50%.
- Evolved the debugger from a simple console tab into a public connector evaluation framework by implementing connector-level scoring for MCP connectors.
- Owned high-priority fixes across connector infrastructure, OAuth authentication, caching, backend services, and observability, shipping production improvements within the first weeks of joining.

Software Engineer Intern

August 2025 – October 2025

Athena Studio

Luxembourg City, Luxembourg

- Designed and built from scratch a developer-facing monitoring dashboard reducing manual analysis time by 60%.
- Integrated an LLM-based clustering pipeline automatically grouping 30k+ user queries into key topics.
- Automated testing and CI/CD workflows, increasing code coverage from 0% to 85% and improving release reliability.

Software Engineer Intern

February 2025 – July 2025

Salomon

Annecy, France

- Developed a beta mobile application with Flutter (iOS/Android), expanding the tester base from 8 to 120 users.
- Led backend development by building Serverless REST APIs with Node.js and designing scalable data pipelines with AWS DynamoDB and S3, enhancing data availability and supporting mobile feature integration.
- Automated multi-env deployments and CI/CD pipelines, including App Store and Play Store releases.
- Partnered with UX designer, led workshops, and conducted 10+ user interviews to refine features. Participated in daily Agile stand-ups, gaining solid Scrum experience.

Software Engineer Intern

March 2024 – July 2024

French Ski Federation

Prémanon, France

- Conceived from scratch a full-stack analytics platform using PostgreSQL, FastAPI, Docker, Streamlit, and GitLab CI for automated deployment. Introduced new performance insights, reducing race analysis time by 70%.

EDUCATION

ISAE-SUPAERO

2022 – 2026

Master of Engineering, Data and Decision Science

Toulouse, France

- **Coursework:** Machine Learning, Deep Learning, Big Data Engineering, High Performance Computing, Mathematics.
- **Thesis:** 3D Medical Image Segmentation using Convolutional Neural Networks and Transformer architectures.

University of Limerick

Autumn 2024

Erasmus semester, Data Science

Limerick, Ireland

- **Coursework:** Machine Learning, Deep Learning, Database Systems, Advanced Data Analysis.

PROJECTS

Victorian Author Attribution | *Python, Machine Learning, NLP, Scikit-Learn*

November 2025

- Achieved 95% accuracy in author prediction by training and tuning machine-learning classifiers on text features.

Kaggle Hackathon – Heart Risk | *Python, Machine Learning, Data Engineering, Scikit-Learn*

November 2025

- Designed and implemented a complete data preprocessing pipeline for a large-scale health dataset with 200k+ rows. Achieved 75% accuracy in predicting heart attack risk by developing machine learning models (Random Forest, SVM).

TurboKMeans | *C, OpenMP, High Performance Computing (HPC)*

October 2025

- Parallelized a K-Means-based image compression algorithm achieving a 4× speedup vs single-thread baseline.

Hackathon ENS | *PowerShell, Makefile, Docker*

June 2025

- Created a PowerShell script to streamline Windows dependency setup, cutting bugs and boosting speed by 15%.

SKILLS

Frameworks: PyTorch, Scikit-learn, FastAPI, Redis, Flutter, Selenium.

Cloud & DevOps: Docker, Kubernetes, AWS, Fastlane, GitLab CI/CD, GitHub Actions, Grafana.

Auth & Protocols: OAuth 2.0, MCP Protocol.

Languages: French (native), English (C1).

ADDITIONAL ACTIVITIES

- **Chess:** **Competitive FIDE player (Elo 1954)**, consistently ranked top 20 nationally in French Youth Championships.
- **Triathlon:** Regularly compete in endurance events, demonstrating discipline, goal-setting, and long-term commitment.
